PROFILE

My objective is to pursue a fulfilling career in web development, as I am an ambitious and dedicated individual with a growing passion for crafting remarkable digital experiences. My interest in the mechanics of the web led me to master fundamental languages and technologies such as HTML, CSS, JavaScript, jQuery, Bootstrap, MySQL, and PHP. Through self-directed projects and ongoing learning, I have developed the skills to design visually captivating, user-friendly websites while also mastering back-end processes to create dynamic, data-driven applications. I take pride in being a collaborative team player, and I enthusiastically welcome obstacles and excel in the ever-evolving landscape of web development.

WORK EXPERIENCE

Student Internship Team-Co-ordinator

IHRP   2021-2021

- To ensure seamless task completion, it's essential to establish clear communication channels between the Team Leader, Project Supervisors, and team members.

Projects

1. **Dynamic Landing Page with User Interaction:**

One of my notable projects is a landing page created using HTML, CSS, and PHP, where I integrated a MySQL database. This dynamic landing page not only showcased my proficiency in front-end development but also demonstrated my ability to handle user interactions through PHP. By utilizing MySQL for data storage, I illustrated a foundational understanding of back-end functionality. This project allowed me to hone my skills and deliver a seamless user experience, instilling confidence in my ability to tackle real-world web development challenges.

2. **Personal Portfolio Showcase:**

As a fresh web developer, I designed my personal portfolio website using HTML, CSS, and JavaScript. This platform not only highlights my skills but also embodies my creativity and dedication to user-friendly design. JavaScript was employed to enhance the website's interactivity, providing a captivating user experience. Additionally, PHP powered the contact form, enabling visitors to connect with me easily. Through this project, I aimed to present my work in an engaging and accessible manner, showcasing my evolving talents and enthusiasm for web development.

SOFT SKILLS/Additional accomplishments

- Accomplished certifications in C-Programming and Advanced Excel.

- Qualified for the city finals event organized by The Times of India.
